LF AI & DATA | Bitol

AI at the Heart of Bitol's Strategy

v7.6.1 • Jean-Georges Perrin • jgp@jgp.ai

Our journey so far...

2023
PayPal open sources the data contract template

Bitol created
ODCS released

2024
Working governance model

ODCS v3
Bitol reaches Incubation

2025
ODCS v3.1
ODPS v1

2026
41% of data contract practitioners use ODCS
ODCS v3.2
ODPS v1.1
and...

Bitol reaches Graduation?
New standards?

Vision

Update April 2026

Our vision is a portfolio of standards driven by ODCS and ODPS.

We may experiment with other standards, released as draft v0.8.0 where people can bring their ideas, needs, and more. If nothing happens on those ancillary standards for a year, we retire them.

LF AI & DATA | Bitol

Roadmap

	Q2	Q3	Q4	
ODCS	v3.2.0 RFC 28, 33, **30**, **33**, 34, 36, 38, 41 RFC 31, 32, 35 if possible		v3.3.0 RFC 27	**CORE**
ODPS	v1.1.0 RFC 28, **29**, 38, 41		v1.2.0?	
ODMS (to rename)			v0.8.0 RFC 15, 38	**ANCILLARY**
OORS (Obs Results)	v0.8.0 RFC 18			
OOCS (Orchestration)		v0.8.0 RFC 40		
OMDS (Metadata Diff)		v0.8.0 RFC 39		
OMMS (Maturity Model)	v0.8.0 RFC 37

2024 & Beyond

LF AI & DATA | Bitol

ODCS - Data Contract

CORE

Standardized data contract

- v3.1.0 2025-09 Minor evolution
- v3.0.2 2025-03 Maintenance
- v3.0.1 2025-01 Maintenance
- v3.0.0 2024-10 Major evolution
- v2.2.2 2024-05 Maintenance
- v2.2.1 2023-12 First Linux Foundation release
- v2.2.0 2023-07 First release post PayPal

v3.0.0:
- Environment (RFC #1)
- Types (RFC #2)
- New Data structure (RFC #4)
- Cleanup (RFC #5)
- New support mechanism (RFC #6)
- Data Quality (RFC #7)

v3.1.0:
- External references (RFC #9)
- Standard data quality rules (RFC #12)
- Foreign keys & constraints (RFC #13)
- New data types (RFC #17)
- Improvements on SLA (RFC #21, RFC #22)
- Improvements to support channels (RFC #23)
- Extensions to custom properties and authoritative definitions (RFC #24)

vFuture
- Business rules (RFC #8)
- Lineage (RFC #11)
- Named objects (RFC #20)
- Improvement on referencing (RFC #25)

LF AI & DATA | Bitol

ODPS - Data Product

CORE

Define a data product as an assembly of data contracts with an SBOM.

- v1.0.0 2025 First version
- v0.9.0 2025-07 First beta version

ODMS - Data Mesh (or) ODDS - Data Domain

ANCILLARY

Define Data Mesh as a collection of data products. Data Mesh is not always an enterprise.

Draft to be released in 2026

OORS - Observability Results

ANCILLARY

OORS message will be collected from the different censors & probes in your architecture.

Simplified version of OpenTelemetry.

Draft to be released in 2026

OOCS - Orchestration & Control

ANCILLARY

Payload for the control endpoints, allowing remote orchestration.

Draft to be released in 2026

OMMS - Maturity Model

ANCILLARY

Maturity model.

Draft to be released in 2026

OMDS - Metadata Difference

ANCILLARY

Document differences between two ODCS, ODPS files.

Draft to be released in 2026
